

NV9 bank note validator

Since developing the world's first low cost, multi-currency bank note validators, Innovative Technology (ITL) has rapidly grown to become a major supplier to manufacturers worldwide. Our track record in research, development and cutting edge innovation is substantiated by our unique SPF™ core technology that ensures an industry-leading acceptance rate for multi-currency banknotes of typically **99.8%**. With distribution throughout 70 countries worldwide, backed by a global network of sales and service providers, ITL is delivering more profitable solutions wherever there is a need for higher automated transaction performance.

Direct replacement for NV7 – same dimensions, connections and communication protocols.

New arm processor with 0.5Mbyte FLASH memory, allowing multiple currencies in all four note orientations.

Currency database for many countries available free over the internet. Cloning – NV9 to NV9 re-programming for easy in-the-field updates. Currency and firmware programming via PC

Horizontal mounting for gaming and amusement applications. Vertical vending bezel to suit many popular designs of vending machines.

New advanced florescence detector to reveal hidden security features.

Best value: Easy to fit, simple to service and designed for a long life

All note handling contained within one unit – 300 and 600 cash box options.

New High-speed drive motors reduce validation and stacking times – note credit in 3 seconds. New improved anti-fishing (stringing) devices to prevent mechanical fraud.

Simple to interface – including parallel, pulse, SSP (Smiley Secure Protocol), CCTalk, MDB, and more. Single note escrow function.

Kevlar lined belts to drive the bank notes right through to the cashbox.
