

Kiosk Mat with USB Connection

USB connection makes set-up fast and easy

**DURABILITY &
50 YEARS
DEPENDABILITY**

Eliminate unattended unauthorized access to kiosks with the pressure sensitive security USB Mat.

Larco's USB mat operates from a computer via the USB port. The mat sends a series of keystrokes to the computer which allows the mat to identify if a user is at the kiosk.

A second set of keystrokes is sent to the computer when the user steps off the mat. This will automatically log off the user and the session will end.

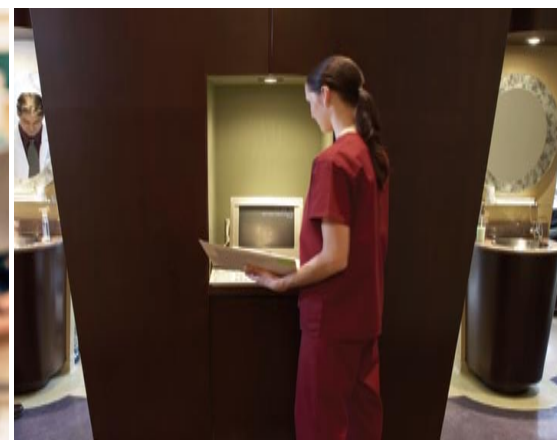

Typical Installation:

- Bank Tellers & ATM's
- Human resource kiosk
- Hospitals
- Information Kiosk in shopping malls, museums, airports etc.

Features & Benefits:

- Hands free computer security
- Programmable log-on and log-off
- Precise sensing method eliminates nuisance detections
- Plug and play USB connection
- Energy saving feature
- Works with existing security

Design Options:

- Surface finish: Fine ribbed surface (standard). Also available with pebble finish, course ribbed or sure step finish.
- Standard colors: Black, brown and gray. Additional colors are available to match your decor.
- Custom lettering and logo's available
- Custom shapes and sizes available
