

DESIGNED FOR THE GAMBLING MARKET.
Unique technological innovation combined with quality and affordability.

RM5 CCTALK

ELECTRONIC COIN VALIDATOR

- The coin validator is interfaced to the machine board via a serial line, as provided by CCTALK protocol. It therefore perfectly meets the cctalk protocol and the unmodifiability requirements of Italian law 289.
- Unique technological innovation combined with quality and affordability confirmed by over 400,000 units in the marketplace.
- It has been tested and approved by the main board manufacturers, both in Italy and abroad; it is therefore perfectly compatible with the most known models of boards currently produced on the market.
- It is equipped with two different connectors as required by CCTALK specifications to satisfy the widest connection requirements and it can drive 2 to 4 way sorters plus reject.

TECHNICAL FEATURES

SIZE	STANDARD 3 INCHES 1/2
WEIGHT	185 GR.
POWER SUPPLY	12 ÷ 24 VDC ±10%
OPERATING TEMPERATURE	0 ÷ 55°C - 10 TO 75% - NON CONDENSED HUMIDITY
STORAGE TEMPERATURE	0° ÷ 55°C
CHANNELS	16 - ALL EURO COINS 0.01 ÷ 2 RECOGNIZED
MAXIMUM ACCEPTANCE SPEED	3 COINS/SEC.
COIN ACCEPTANCE	DIAMETER 16 ÷ 31,5 MM - THICKNESS 3,3 MM MAX.
CONSUMPTION TESTED AT 12 VDC	STAND-BY: 35 MA MAX. 12 VDC RECOGNIZING: 50 MA MAX. 12 VDC ACCEPTING: 340 MA MAX. 12 VDC
CONFORMITY DECLARATIONS	EN 61000-6-1: EMC PAYOUT POSITIONS EN 55022: IMMUNITY FROM RADIO NOISES AND INTERFERENCES EN 60950: SAFETY

KEY BENEFITS

- Unique technological innovation combined with quality and affordability confirmed by over 400,000 units in the marketplace.
- The coin validator is interfaced to the machine board via a serial line, as provided by CCTALK protocol. It therefore perfectly meets the unmodifiability requirements of law 289.
- It has been tested and approved by the main board manufacturers, both in Italy and abroad; it is therefore perfectly compatible with the most known models of boards currently produced on the market.

- It is equipped with two different connectors as required by CC TALK specifications to satisfy the widest connection requirements and it can drive 2 to 4-way sorters plus reject.

ACCESSORIES

- Frontals mod. F1 (60x118 mm) - F3 (60x180 mm) - F6 (60x152 mm), (fig. 2).
- Coin collection funnels different heights: 9, 16, 25 mm (fig. 1).
